Day 1

Day 2

# WELCOME

Dear Attendees,

Welcome to the third edition of MiningTech North America Conference. We are honoured that you can join us here in Vancouver, British Columbia (BC) for this event.

This year, we're thrilled to hold our event here at the Vancouver Convention Centre, a new and larger venue chosen to meet the growing demand for exhibition space. The expansion reflects the incredible momentum we've built – our number of sponsors and exhibitors has more than tripled compared to last year. We're proud to welcome participants from across Canada, USA and as far away as Australia, all coming together in Vancouver to showcase innovation, collaboration, and industry excellence.

This year's event will bring together industry leaders, innovators, and experts to explore the latest advancements shaping the future of mining and resource development. Discussions will focus on cutting-edge innovations and developments in IoT, automation, and digital transformation, highlighting their applications across the entire mining value chain – from exploration and mineral processing to underground and surface mining, waste and tailings management. The conference program will also delve into the integration of supply chain optimization, logistics, and talent management, emphasizing how technology is driving efficiency, safety, and sustainability in modern mining operations.

A special feature of this year's conference will spotlight British Columbia, showcasing the province's rich mining heritage, its economic significance, and the pivotal role the mining sector plays in supporting local communities and driving regional growth.

This event in Vancouver is part of our MiningTech Conference and Exhibition series that we also host in Latin America. First started in Santiago, Chile in 2018, MiningTech South America will return to Sao Paulo, Brazil from December 8-9, 2025. Besides MiningTech North America, we also organise the global Energy Transition, Critical Minerals and Mining Investment Conference Series. To date, this Conference Series have been held in Singapore, Japan, India, Australia, UK, United Arab Emirates, Canada and USA. Globally, our events cover Africa, Australia, Asia, Latin and North America and Europe. To find out more, you can speak to us or browse at our website [www.spire-events.com](http://www.spire-events.com).

In closing, we hope you will make many meaningful connections over the formal and informal conference and networking sessions over the next few days. Have a great MiningTech North America Conference and Exhibition experience ahead.

Yours sincerely,  
Daniel Radziszewski  
Managing Director, Spire Events

## GOLD SPONSORS

---

**Quartex** helps companies in high-risk, asset-intensive industries operate safely and efficiently. From flight scheduling and accommodations to permitting and resource governance, our customers get everything they need to run every site right. For far too long, mining and other resource companies have had to worry about high-stakes mistakes. One small error can seriously impact their workforce, the surrounding community, or their license to operate. But with solutions from Quartex, they can get better insights, take smarter actions, and see stronger results.

# Powering the Digital Mine from Exploration through Reclamation

## Driving Excellence in Mining

- Simplify complex mining and asset operations through integrated cloud solutions
- Enhance safety and operational efficiency with intelligent automation
- Unlock actionable insights using IoT, data analytics, and AI driven intelligence

## Industry Leadership

Mining leaders trust Syntax to modernize operations with secure, integrated SAP Cloud ERP solutions. We bring 25+ years of SAP expertise to help you streamline processes, automate reporting, and embed analytics and AI for smarter decision making.

*Our adoption of SAP S/4HANA has established a robust foundation for us to evolve into an insights-driven organization and further our on-going endeavors to unlock efficiencies across the business. Thanks to Syntax for their collaborative approach and industry expertise."*
